Apr 28	class meeting		OMALS interns: rotations may end May 2 (see elective option)		

\*During the weeks noted with an asterisk, OMALS interns work in their rotation sites for only three days. One day is reserved for asynchronous graduate course activities. The director schedules these days in advance with the preceptor.

### Scheduling Notes:

- Elective option - Interns have the option to schedule an elective experience at the end of the internship, extending the last day of rotations by up to two weeks.
- Supplementary days will be added as needed to meet unmet competencies and/or supervised practice hours.
- OMALS interns will complete approximately one extra week of rotations in both the fall and spring semester as compared to interns who already have a graduate degree.
- The final day of spring rotations for OMALS interns may be impacted by the scope of their Project and Report.

*OMALS interns will be eligible to take the RDN exam when their graduate degree has been conferred.*
